

Flag Fliers

Teams:

Equipment	2 cones, 5 flags.
Position of the Equipment	1 cone on centre line containing 4 flags, 1 cone on 2 yard (1.8m) mark at changeover end. Both cones to be positioned in between the lines of bending poles. Rider 1 starts carrying a flag.
Position of the Riders	All riders will be at the Start/Finish end of the arena
The Game	Rider 1, carrying a flag, rides to the changeover end, places the flag in the cone, returns to the centre cone, collects a flag and returns to hand it over to Rider 2. Riders 2, 3, and 4 complete the course in the same way. If a flag cone containing flags is knocked over, the rider must replace the cone so that it contains the correct number of flags. The rider may then continue the race carrying any flag, not necessarily the one originally selected.
